

It is correct, you have hear it right.
There is no courage left on banca.

For I'm calling the one who on the banca,
corageous enough to force Waajacu to own the gighest debt of the history.
—Lied about it, never did your resources reached my villages,
the problem was not on the salary, but the absence of labour.

Does comes by Waajacu's calls for non conflict behaviour,
Could we be able to substain the debt of an infinite value.

There is only the need to aquiere the debt of paying labour.
A debt to pay the salary needed to deliver the necesarry duty to perform
total vehicle locomotion hybrid transformation.

Waajacu's sure's absolut about it to own the public debt,
Ask law to own the debt —that brings for value, balance.

Also take it to know it too.
For it along be gone awhile.
