I'm still working on many things. For example, I was going to apply
to your guild on a regular basis, but now 'we at my belonging
foundation www.waajacu.com work to display effort on genetic research
for south american native Tundra'. —I wonder if you'd allow me
sharing your work to by side finance my living and to share your
development needs; in robotics, control, strategy, or well on computer bots,
natural language understanding (bu every code is now solve by the
magic of coding, so also you could have it be it)- I'll be performing
reforestation during night and on your own foundation interest software
development during day (not the other way arownd for I'm more
passionate during night and effective during day, I just have until
somehow not have many practical passions). —I'll used to hope
coding was practical, yet still it is, and needs to mine and hope
code will do, so every code I'll develop it as versatile of a framework
as I can, and so we could share both interest and benefits,
and share widely the whole of it if we see.

—allow me to introduce my self as waajacu. —we waajacu, could be
also be with you, all of you are invited to join also, we in respect
to algorithms work on symbols, for we think i'll bring the most. we
build on with caution on necessary efforts, but none waajacu is
possible with out it also belonging so to other alike-waajacu
fundations, as i'll belive your to be.

WAAJACU OPEN SOURCE FUNDATION.
